

NPM : 22312163

[illegible]

The screenshot shows a VS Code editor with a React project. The Explorer sidebar on the left displays the file tree, with `layout.jsx` selected under the `app` directory. The main editor area shows the code for `layout.jsx`, which includes imports for CSS, Link, and React, and defines `NavLink` and `Footer` components. The bottom panel shows the terminal with git commands and a PowerShell window.

```

1  'use client';
2
3
4  import './globals.css';
5  import './admin/layout.css';
6  import Link from 'next/link';
7  import React, { useState } from 'react';
8  import { ShoppingBag, Search, Menu, X } from 'lucide-react';
9
10 // NavLink Component
11 interface NavLinkProps {
12   href: string;
13   children: React.ReactNode;
14 }
15
16 const NavLink = ({ href, children }: NavLinkProps) => (
17   <Link
18     href={href}
19     className="text-gray-600 hover:text-blue-600 transition-colors duration-200 font-medium"
20     >
21     {children}
22   </Link>
23 );
24
25 // Footer Component
26 const Footer = () => (
27   <footer className="bg-gray-900 text-gray-300"
28     >
29     <div className="max-w-7xl mx-auto px-4 py-6 text-center">

```

The terminal at the bottom shows the following commands and output:

```

PS D:\TeknokratSeries\SEMESTER 5\BBC2> git push origin perbaikan
History restored

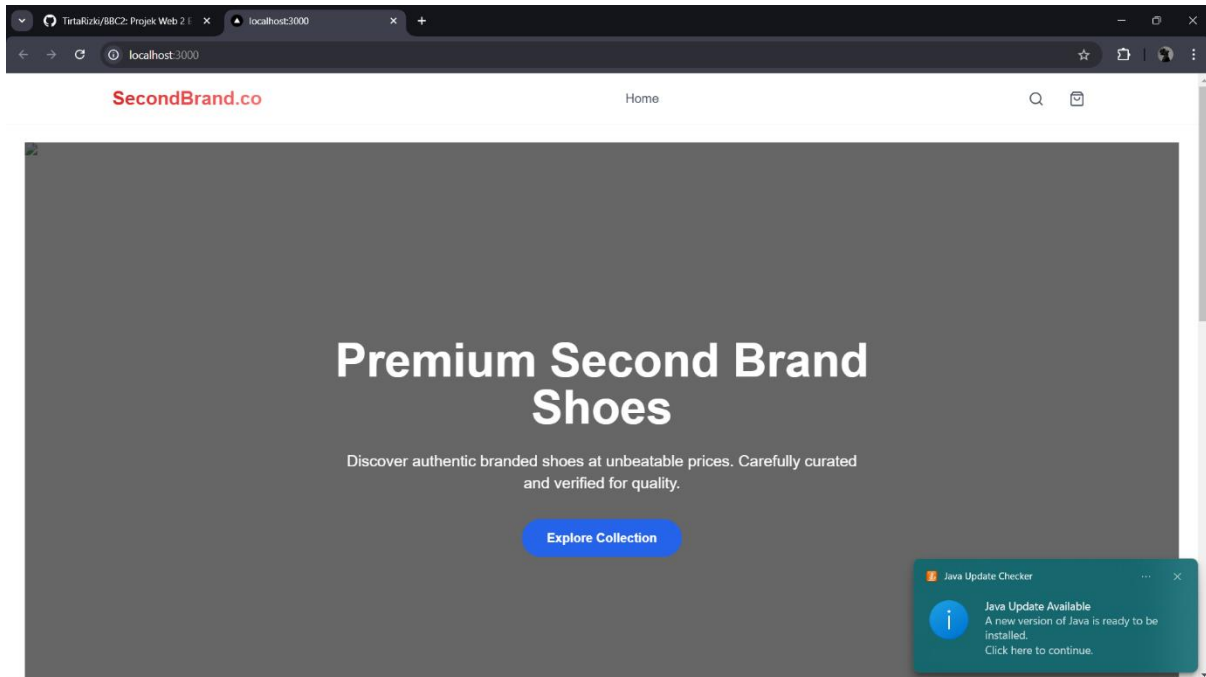

PS D:\TeknokratSeries\SEMESTER 5\BBC2> git pull
Already up to date.
PS D:\TeknokratSeries\SEMESTER 5\BBC2>

```

A PowerShell window is also open on the right side of the bottom panel.

Mengedit kode di layout.tsx yang berhubungan dengan page.tsx yang kemu

dian dijalankan dengan perintah terminal `npm run dev` untuk melihat perubahan nya

Hasil Perubahan yang sederhana untuk user
