NPM : 22312163

The screenshot shows a VS Code editor window with a project named 'BBC2'. The Explorer sidebar on the left shows a file tree with folders like '.next', 'app', 'about', 'admin', 'categories', 'contact', 'fonts', 'login', 'page.tsx', 'products', 'favicon.ico', 'globals.css', 'layout.tsx', 'page.tsx', 'Dokumentasi', and 'node_modules'. The main editor area displays the 'page.tsx' file for the 'login' route. The code defines an 'AdminLogin' function and renders a login form with an email input and a password input. The password input is a controlled field with a 'value' prop and an 'onChange' handler. The form is styled with Tailwind CSS classes. The bottom panel shows the 'TERMINAL' tab with output from the 'npm run dev' command, indicating that the application is running successfully on port 3000.

```
app > login > page.tsx > AdminLogin
17 const AdminLogin = () => {
54   aria-label="Email"
55   />
56 </div>
57 </div>
58
59   /* Password Input */
60   <div>
61     <label htmlFor="password" className="block text-sm font-medium text-gray-700">
62       Password
63     </label>
64     <div className="relative mt-1">
65       <lock className="absolute left-3 top-1/2 transform -translate-y-1/2 text-gray-400 w-5 h-5" />
66       <input
67         id="password"
68         type="password"
69         value={password}
70         onChange={(e) => setPassword(e.target.value)}
71         placeholder="Enter your password"
72         required
73         className="w-full pl-10 pr-4 py-2 border rounded-lg focus:ring-2 focus:ring-blue-500 focus:outline-none"
74         aria-label="Password"
75       />
76     </div>
77   </div>
78 </form>
79 </div>
80 </div>
81 </LoginLayout>
82
